Woody and Herbaceous Plants

and Other Ornamentals

• • • • •

75 ACRES UNDER CULTIVATION

• • • • •

Our stock has been examined by the Entomologist to the North Carolina Commission for Controlling Crop Pests, who has found it healthy and without indication of any of the scales or insects designated as dangerous by the Commission. To further protect our customers, stock will from now be subjected to fumigation before packing, if desired. Copy of certificate will be attached to every shipment.

Our **FREIGHT AND EXPRESS OFFICES** are at Pinehurst, N. C., on the A. & A. Railway, which connects with both the Southern and Seaboard Air Line Railways.

TRANSPORTATION RATES by *freight* from here are, to New York city 63c., to Boston 68c., to Richmond, Va., 38c., to Atlanta, Ga., 52c., per 100 pounds; and by *express* to New York \$2.20, to Boston \$2.60, to Richmond, Va., \$1.00, to Atlanta, Ga., \$1.60, per 100 pounds.

TERMS: Cash or satisfactory references from unknown correspondents. All book accounts will become due (and subject to sight draft) sixty days from date of bill of lading, where no other arrangements have been made.

DISCOUNTS: We allow a discount of 2 per cent. for cash with orders or for remittances within fifteen days from date of bill of lading.

REDUCTIONS: On *Woody Plants* we invoice 5 at 10 rates; 50 at 100 rates; 500 at 1000 rates. On *Herbaceous Plants* we invoice 5 at 10 rates; 25 at 100 rates; 250 at 1000 rates. Packing and boxing charged at cost.

SHIPPING INSTRUCTIONS: We solicit precise instructions as to kind of conveyance and route, or we shall ship at our own discretion. All goods travel at risk of consignee.

SHIPPING SEASON: We ship shrubbery from October until May with hardly an interruption. Our storage cellar enables us to keep plants dormant for late orders. We advise, *to send all orders as early as ever convenient* and we shall hold them as long as practicable, if desired by consignee.

COLLECTED SHRUBBERY: We ship very large quantities of collected shrubbery every season in solid car loads and smaller lots to many of the largest parks and to others. We have a well-trained force, which will handle this class of shrubbery with greatest care. We ship well-developed plants with good roots that have not been exposed to the weather, and pack in damp sphagnum moss. We prune the tops of most collected shrubs, if not otherwise instructed, to effect a material saving in freight.

HERBACEOUS PLANTS: Quite a number of perennials we have now in nursery rows, while others will have to be collected on order. Some kinds of these can be identified only when in bloom. Orders on such will be filled in due season. We can collect herbaceous plants in largest lots and at special prices.

AMERICAN TREE SEEDS: Our descriptive catalogue for 1901 of seeds of American conifers, trees, perennials, etc., will be gladly sent upon request.

THIS LIST CANCELS ALL PREVIOUS QUOTATIONS.

OTTO KATZENSTEIN,
Manager.

Abies Arizonica, Merr.

Silver Cork Fir.

Since our first introduction of this fir in 1901, it has rapidly gained the distinction as the most beautiful conifer under cultivation. It is so well known now to all interested circles that we need hardly do more than call attention again to its most unique SILVER-WHITE TRULY CORKY BARK and its SILVER-BLUE FOLIAGE. This bark has to be seen to be fully appreciated, and we have, therefore, attached a sample of it to the cover of this list.

Arizona is a large state and not by any means as hot and tropical in all its parts as is generally supposed. Our SILVER CORK FIR, for instance, grows in the highest altitudes and knows more about early and severe winters than a good many other perfectly hardy conifers. It is mostly found in moist ground and in fairly moist atmosphere, and it will be advisable to give it where possible similar climatic conditions under cultivation.

It is naturally a rapid grower and under good treatment will soon show all its good points. The beauty of the white bark grows more evident as the trees attain size, but it is not fully developed until the trees are about four feet high.

Dr. Purpus succeeded in gathering some seed of the SILVER CORK FIR last season, and we cannot only now offer

PLANTS averaging from 9" to 18" at \$3.00 each or \$27.50 for 10, but we have also a limited amount of

SEED at \$25.00 per lb., \$7.50 per quarter lb., \$2.50 per oz., \$1.00 per packet of about 200 seeds.

Besides the tall growing form, Dr. Purpus has discovered an alpine dwarf variety,

ABIES ARIZONICA NANA, of which we can offer SEED now at same prices as for the mother form. This dwarf form is said to have still more strikingly white bark, and it will adapt itself to alpine gardens.

Woody Plants.

Col., collected plants. S., seedlings. C., from cutting bed. All others are nursery-grown and transplanted.

CONIFER TO PLANT NOW.

Cordons.

	Size	Each	10
Cordons —Single and double arm	3-5'	2.50	22.20

Apples—(on Paradise) Alexander, Baldwin, Chenango, Early Harvest, Gravenstein, Jonathan, Northern Spy, Primate, Sweet Bough, Tompkins King, Wagner, Wealthy.

Pears—(on Quince) Angouleme, Anjou, Bartlett, Clapp's Favorite, Easter Beurre, Hardy Giffard, Howell, Josephine of Malines, Lawrence, Louise Bonne of Jersey, Superfin.

These peculiarly trained dwarf fruit trees, of which we have a limited number to offer, are especially adapted to private places, where they surely will be a permanent source of interest, pleasure and profit. Year in year out they will repay diligent care by sure crops of fruits of extra large size and of a very superior quality. The main trunk of our about three-year-old plants is bent 18 inches above ground in "T" shape, or with a few with one arm. Our trees are covered with fruit branches and are ready to bear next year. We are ready to give any desired cultural directions.

Herbaceous Plants, Roots and Bulbs.

For a complete list of all seeds which we have to offer we beg to refer to our Descriptive Catalogue of American Seeds.

We deliver a collection of 12 packages of seeds of choicest herbaceous plants, our selection, at 90 cents.

Ask for our folder, "How to Make Tree Seeds Grow."

Collectors of tree seeds, etc., are requested to send us their lists for the coming season.
